OBJECTIVE

I'm a final-year Computer Science student passionate about backend development. I've built real-world projects using Python, Fast API and Machine Learning. Eager to learn more, grow as a developer, and contribute to meaningful work.

EDUCATION

- **Kalasalingam Academy Of Research And Education** Sept 2022 - Apr 2026
B.Tech-Computer Science And Engineering KrishnanKoil, T.N
 - GPA: 7.87/10.0
- **Aditya Junior College** Apr 2022
Pre-University Education Bhimavaram, A.P
 - Grade: 7.6/10

PROJECTS

- **Placements Connect** July 2025 
Tools: Python, FastAPI, React.js, SQLAlchemy, MySQL, JWT Authentication, HTML, CSS
 - Created a web-based platform to manage campus placements and internships with role-based dashboards for admins, faculty, and students.
 - Implemented features for students to track companies, apply for jobs, and receive interview schedule notifications.
 - Built faculty tools to post placement updates and generate applicant lists for each job with a single click.
- **Animal Intrusion Detection System** Feb 2026 
Tools: Python, YOLOv8, OpenCV, TensorFlow/Keras, Firebase, Image Processing
 - Built an animal intrusion detection system using Python, YOLOv8, and OpenCV to identify animals in real-time camera feeds.
 - Integrated Firebase backend to automatically capture intrusion images and store them in a cloud database.
 - Implemented an email alert system to notify farmers instantly when animal intrusion is detected.
- **Project Collaboration System** September 2025 
Python, FastAPI, SQLAlchemy, MySQL, React.js, JWT Authentication, HTML, CSS
 - Built a project collaboration platform allowing companies to share projects and track team activity using role-based access for Super Admins, Admins, and Employees.
 - Developed RESTful APIs using FastAPI to manage projects, users, and company data efficiently.
 - Built a responsive React.js and TypeScript interface with a MySQL database using SQLAlchemy to track project progress and team activity.

SKILLS

- **Programming Languages:** Java, Python, SQL, Html, Css
- **Web Technologies:** FAST API, REST APIs
- **Database Systems & Caching:** MySQL, PostgreSQL, Firebase, MongoDB
- **Event Streaming & Messaging:** Email Notifications
- **Machine Learning:** NumPy, Pandas, Scikit-learn, Matplotlib, TensorFlow, Yolo, Computer Vision
- **DevOps & Version Control:** Git, GitHub
- **Interested Areas:** Backend Development, REST API Design, JWT Authentication, Event-Driven Systems, Project Architecture

POSITION OF RESPONSIBILITY

- **Soft Computing Resource Society (SCRS)** Sept 2025 - Present
Graphics Design Co-Lead
 - Led the graphics team in designing promotional materials such as posters and social media content for club events.
 - Collaborated with members to maintain consistent branding and improve visual communication across campaigns.
 - Coordinated design tasks and ensured timely delivery of graphics for events and promotional activities.

CERTIFICATIONS

- Design and Analysis of Algorithms - [Certificate](#)
- Database Management System - [Certificate](#)
